

@Louis_CAD

Don't break structured concurrency 🙏

- Breaking it can lead to leaks of memory, CPU, and other resources, **degrading your app, and draining millions of batteries.**

• Avoid Global Scope

Don't break structured concurrency 🙏

- Breaking it can lead to **leaks** of memory, CPU, and other resources, **degrading** your app, and **draining** millions of batteries.
- Avoid GlobalScope

Don't let your coroutines be garbage collected
