

Croutines in *the last 3 years*

• AP/changes/graduation

• **SharedFlow, StateFlow**

Knottin.Rust

• Google and courtes

Officially recommended (over the approaches) since 2020 (2019?)

• **Embedded in AndroidX (Compose, Paging, ViewModel, etc.)**

• The community and routines

More routines as age increases and open projects

• Example: AWS Kinesis Data Streams suspend functions

Coroutines in *the last 3 years*

- API changes/graduation
 - Flow
 - SharedFlow, StateFlow
 - kotlin.Result
- Google and coroutines
 - Officially recommended (over other approaches) since 2020 (2019?)
 - Embraced in AndroidX (Compose, Paging, Wear Watchface, etc.)
- The community and coroutines
 - More coroutines usage in closed source and open source projects
 - Example : AWS Kotlin SDK exposes suspending functions

Coroutines and me (quickly)
